

NEW GLOSSY WITH REVOLUTIONARY LAMINATED SAFE TANK

AQUAEL designers surprised again - a revolution in aquaristics!

AQUAEL aquarium tanks have been adapted for many years to high European standards in terms of glass thickness, standards and quality of workmanship. AQUAEL Research and Development Department set the bar even higher. This is how the new GLOSSY WHITE was created in the innovative „Laminated Safety Tank” technology. Safer than ever and energy-saving.

Two glass panels combined with lamination technology were used - ultra-thin and transparent, special foil. This solution means that you do not have to worry about immediate unsealing of the tank in the event of accidental breakage of the aquarium. You have time to calmly evacuate the inhabitants of your aquarium.

As the new GLOSSY WHITE aquariums are made of three layers, which results in a slowing down of heat loss. Thanks to this, the heater turns on less frequently, and therefore your electricity bills are lower!

Do not wait, order today!
